## ARTICLE XI. COMMUNITY USE AND NONRESIDENTIAL DESIGN

### DIVISION 1. GENERALLY

#### Sec. 106-2346. Purpose.

(a) This article addresses the design standards to be applied to Traditional Neighborhoods Developments, Planned and Multi-Family Communities, Manufactured Home Communities, and nonresidential developments, and Planned Unit Developments. It also provides regulations to ensure the quality of development and prevent monotony. These ~~community~~ development options require special design controls if they are to be successful. In traditional communities and neighborhoods around the nation, as well as in the county, buildings were built incrementally in small numbers so blocks developed over an extended period. The result is a great diversity in scale, style, and detail.

(b) All nonexempt development occurring along or requiring access from the following county highways: U.S. 278, S.C. 170, S.C. 46, S-163, Bluffton Parkway, Buckwalter Parkway, U.S. 21, U.S. 17, S.C. 802, S.C. 280, S.C. 21, and S.C. 116, shall require approval from the appropriate corridor review board, before consideration by the DRT. Refer to subdivision VI of division 2 of article II of this chapter and division 5 of article III of this chapter for additional guidelines and procedures for these reviews.

**Secs. 106-2347--106-2375. Reserved.**

### ~~DIVISION 2. COMMUNITY USE DESIGN AND STANDARDS~~ TRADITIONAL NEIGHBORHOOD DEVELOPMENTS

[Note: Division 2 is replaced in its entirety]

#### Sec. 106-2376. Purpose

The purpose of the Traditional Neighborhood Development option is to support the development of human scale, walkable communities where residences, business and commercial uses are within walking distance of one another. These can range from moderate infill or redevelopment projects located in already-developed areas and relying on adjacent land uses, to larger new towns complete within their own village centers and hundreds of acres of mixed housing types. Buildings within these communities can vary as well, from neighborhoods consisting primarily of single-family attached and detached dwellings, to mixed use centers, complete with integrated retail, civic, office and residential uses, including live-work units, and housing units located on top of shops.

The various uses are connected and unified by a network of streets providing a pedestrian and bicycle-friendly environment. Within this street network on-street parking is provided as a traffic-calming and pedestrian-safety device, while street trees and sidewalks create a pleasant and safe walking environment. The pedestrian-oriented nature of the district is reinforced by human-scaled buildings that relate to the street, provide safe pedestrian access, and create a distinct district identity. In addition, the master planned nature of this district allows building

setbacks to be reduced from conventional standards as part of a carefully programmed and cohesive design.

This district also supports the preservation of environmentally and historically sensitive or significant sites and the incorporation of a variety of open space, civic space, and recreational amenities into new development. Traditional neighborhood developments require specific design controls if they are to be successful. In traditional neighborhoods around the nation, as well as in the county, buildings were built incrementally in small numbers so blocks developed over an extended period. The result is a great diversity in scale, style, and detail.

#### **Sec. 106-2377. Definitions**

(a) *Bungalow Court.* Bungalow courts consist of between 6 and 10 single story or 1-½ story differentiated semi-detached units grouped around a shared pedestrian courtyard. The courtyard must be entered from the street through some form of gateway and be of sufficient size to create a hierarchical transition from the public street to the semi-private courtyard, and then to the individual bungalow.

(b) *Community Garden.* Green spaces that are communally cultivated and tended for the purpose of providing produce, a gardening experience, and/or education to residents of the surrounding community. A community garden may be divided into individual plots or tended in a communal fashion.

(c) *Green Finger.* Reserve areas along a natural feature such as a stream, vegetation, or topographic feature that extend into developed residential and commercial areas of the traditional neighborhood development.

(d) *Live/Work Unit.* An attached building type with a small home business on the ground floor that is owned and operated by the resident of the residential unit above.

(e) *Pedestrian Shed.* The pedestrian shed is the area that is within a 5 minute walk of an activity center such as a park, civic building or commercial center. A five minute walk or ¼ mile represents the distance most people are willing to walk to get to the center.

(f) *Town Cottage.* A Town Cottage is an urban detached single-family dwelling on a small lot that is potentially shared by one or more ancillary buildings. Because of the urban condition, there are no minimum front or side setbacks. Garages and/or surface parking shall be provided in the rear yard or ground level and accessed from an alley if possible. Town Cottages are only permitted in the Neighborhood Center.

(g) *Workforce Housing Units.* A workforce housing unit is any housing unit that is affordable to individuals and families with an income ranging from 65% to 120% of Beaufort County's median income as produced annually by the US Department of Housing and Urban Development (HUD). In order to be affordable, the annual cost of all housing expenses including, but not limited to, mortgage payments, rent, property tax, mortgage insurance, housing insurance (including flood insurance), essential utilities (gas and electric), regime fees, and property owners association fees cannot exceed 35% of the gross annual income of the occupant.

## **Sec. 106-2378. General Requirements**

(a) *Minimum Site Area.* Traditional Neighborhood Developments that are zoned Suburban must have a minimum site area of 40 acres, while those that are zoned Urban must have a minimum site area of 20 acres.

(b) *Location Requirements.* Traditional Neighborhood Developments shall meet at least one of the following locational standards:

- (1) The site must have direct access to an existing arterial or major collector roadway.
- (2) The site must be within ¼ mile of public park or school.

(c) *Mix of Neighborhood Zones.* Traditional Neighborhood Developments are required to have a minimum of two of the following three Neighborhood Zones – Neighborhood Center, Neighborhood General, and Neighborhood Edge.

(d) *Pedestrian Shed.* Where environmental conditions, site size and shape permits, all structures should be situated within ¼ miles of an activity center such as a park, civic building or commercial center.

(e) *Mix of Land Uses and Lot Sizes.* There shall be a variety of housing types in the overall development: single-family detached of various sizes; single-family attached; and multifamily dwellings. While multifamily is permitted, the majority of multifamily units are expected to occur in mixed-use structures or in multifamily housing structures designed to appear to be large, single-family structures.

(f) Diversity of Housing Choices. Traditional Neighborhood Developments are required to provide a diversity of housing options and prices to encourage a mix of incomes among its residents.

(1) Workforce Housing Units. A minimum of 10% of the dwelling units in a Traditional Neighborhood Development shall be workforce housing units in accordance with Section 106-2382.

(2) Accessory Dwelling Units. Accessory dwelling units are permitted in accordance with Section 106-1188 with the exception that there are no restrictions on the percentage of principle dwelling units that can have accessory dwelling units.

(g) *Interconnected Street Network.* Where environmental conditions, site size and shape permits, the site should be developed using an interconnected network of streets with public access that form appropriate size blocks that are no longer than 600' between any two intersections.

(h) *Public Access to All Streets.* All streets shall have no gates or any other fixture that prevents general public access to the streets.

(i) *Direct Frontage on Arterials and Major Collectors.* Where it is deemed essential to the successful development of the community, the DRT may approve frontage on an existing arterial or major collector. However, no typical strip commercial uses will be permitted and development shall adhere to the requirements established in this section and the design guidelines that are adopted with the final approval of the Traditional Neighborhood Development.

(j) *Conceptual Plan Submission.* The Conceptual Plan submission shall include the following:

- (1) A regulating plan consisting of one or more maps showing the following, in compliance with the standards described in this article:
  - a. Location of Neighborhood Zones (Edge, General, Center, and Preserve)
  - b. Mix of uses
  - c. Location, types and sizes of open spaces
  - d. Thoroughfare Network including location of sidewalks and pathways.
- (2) Preliminary design guidelines that assure a cohesiveness of the vernacular and style typical of the Lowcountry (final design guidelines are submitted with the final plan submission).

#### **Sec. 106-2379. Neighborhood Zones**

Each Traditional Neighborhood Development may consist of the following Neighborhood Zones: Neighborhood Center, Neighborhood General, Neighborhood Edge; and Neighborhood Reserve.

(a) *Neighborhood Center.* This is a social, mixed-use hub within walking distance of the surrounding neighborhood general and edge zones. Housing is in more dense rearward and sideyard buildings, often combining upper floor residential with ground floor commercial. All buildings are served by alleys. Thoroughfares typically are streets and avenues with parallel parking on both sides. Open Space is organized into parks and squares. Traditional Neighborhood Developments are required to limit commercial development to the Neighborhood Center. Such areas shall be designated in the concept plan. The county may require phasing of the development to ensure the commercial area is produced. The following shall govern commercial development:

- (1) Commercial uses in the neighborhood center shall be limited to the uses in the Urban Zoning District in Table 106-1098 of this chapter of the ZDSO.
- (2) The build-to setback for commercial buildings shall be from zero to 8 feet. The build-to line shall be specifically approved in the concept plan for the design and landscaping of the community center area.
- (3) Drive-in uses are prohibited, except where they are accessed via a rear alley.

- (4) The total area of commercial uses in the neighborhood center area shall be in proportion to accepted planning standards, allowing for excellence in project design.
- (5) The vehicular access to units shall be via alleys. This permits the rather narrow building fronts to be free from driveways and garage doors.

(b) *Neighborhood General.* This is the most widespread urban fabric, with a mixture of housing types and limited non-residential uses. Housing is typically in rearyard, sideyard, and all yard buildings, with accessory structures at the rear. The thoroughfares are streets or roads with or without curb, and parallel parking. Open space is organized into parks and playgrounds.

- (1) Non-residential uses in the neighborhood general shall be limited to the following:
  - a. Home occupational use on the ground floor as long as the activity is that of the property owner and the property owner is in residence in the dwelling. Home occupational uses shall follow the standards set forth in this chapter.
  - b. Home business use in an accessory structure as set forth in this chapter.
  - c. Institutional uses, such as churches and schools.

- (2) The vehicular access to units shall be via alleys.

(c) *Neighborhood Edge.* This is a residential fabric with low to moderate density. Housing is exclusively in all yard or sideyard buildings. Non residential uses are limited to home occupational use and special recreational or civic uses, relating to adjacent forests or waterfront. Home occupational uses shall follow the same standards as the neighborhood general zone set forth in this section. The thoroughfares are roads with soft edges and no curbs. Periodic parking is accommodated on the roadside.

(d) *Neighborhood Reserve.* The Neighborhood Reserve consists of all areas within the traditional neighborhood development that are set aside as passive open space including lands delineated to meet the protected resource requirements of Section 106-1782 and the bufferyard requirements in Section 106-1617. The neighborhood reserve shall be counted as part of the minimum open space required by table 106-1526.

- (1) With the exception of green fingers and community gardens, the neighborhood reserve should be situated generally outside of the pedestrian sheds established in the traditional neighborhood development.
- (2) To the greatest extent feasible, the neighborhood reserve should consist of a continuous network of contiguous open space, buffers and preserved lands within the traditional neighborhood development.
- (3) Where there are natural features and preserved lands located on abutting properties to the traditional neighborhood development, the neighborhood reserve shall adjoin these features.

- (4) Agricultural uses, community farms and community gardens are permitted within the Neighborhood Reserve with the following restrictions.
- a. Habitable structures, bed and breakfasts, other commercial structures and parking areas that are part of a community farmstead are not permitted within the neighborhood reserve. Community farmsteads shall be situated so that these structures are located in an adjoining Neighborhood Edge or Neighborhood General zone.
  - b. Agricultural structures such as barns, coops, storage sheds, and education facilities are permitted within the neighborhood reserve.
- (5) Uses and development standards within the neighborhood reserve shall meet the requirements of Article VII, Division 4.

(e) *Development Standards Applicable to All Neighborhood Zones:*

(1) *Principal Building and Yard.*

- a. Stoops, balconies, porches, and bay windows may encroach within front and corner side setbacks. Balconies and Arcades may encroach within the right-of-way the width of the sidewalk only in the Neighborhood Center zone.
- b. Double frontage buildings shall have the required front setback along both frontages unless otherwise designated on the Regulating Plan.
- c. Buildings shall show 2, 4, or 6, projecting corners to frontage, but no more than 6.
- d. Attached buildings on corner lots may move required front setback forward or backward a maximum of 6'.
- e. Fences, garden walls, and hedges may be built on property lines or as a continuation of building walls.

(2) *Principal Building Height.*

- a. Within the Traditional Neighborhood Development, building height is measured from grade to average height of the highest roof surface.
- b. Residential ground floors shall have a minimum height of 9'. Commercial ground floors shall have a minimum height of 12'.

- c. Structures such as, but not limited to, observation towers shall be allowed to reach an accessible height of 60 feet if all of the following conditions are met:
  - 1. Structure is constructed on other than residential lot.
  - 2. Structure with a footprint of 250 square feet or less.
  - 3. Structure that is uninhabitable.
  - 4. Structure meets conditions for construction stated by Beaufort County building codes and local fire officials.
- d. Church steeples and other architectural features shall be allowed to reach a height of 100 feet from finished grade.

(3) *Accessory Structures.*

- a. Accessory structures shall have a maximum of 625 habitable square feet.
- b. Maximum building height shall be 22', measured from grade to eave.
- c. Home occupational uses are permitted within an accessory structure if the activity is that of the property owner and the property owner is in residence in the primary dwelling. Accessory units cannot be rented to businesses.
- d. Only one habitable accessory structure with a kitchen permitted per residential lot.
- e. Accessory Dwelling Units shall follow the standards set forth in Sec. 106-1188.

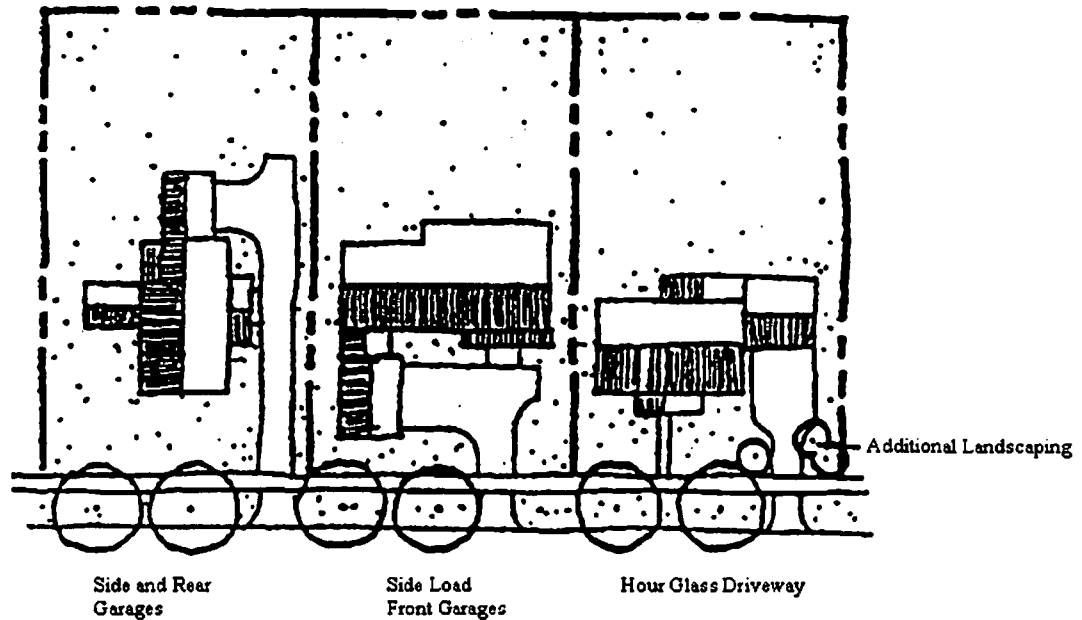

(4) *Garages.* Front loaded garages are permitted on lots with widths of 50' or greater, and the following shall be used to reduce the impact of drives and garages (figure 106-2378(b)):

- a. Garages shall be recessed from the primary building façade a minimum of 20' with a drive of no more than ten feet in width providing access and may include pervious medians.
- b. Side load front garages shall be used on at least 40 percent of lots where the garage is not to the rear of the lot.

(5) *Live Work Units.*

- a. Uses within the live work units are limited to those uses that are permitted in the Neighborhood Zone in which the unit is located.
- b. In the Neighborhood Center Zone, where there is a mix of residential and non-residential uses in a live-work Unit, residential uses are limited to the second, third and fourth floors.
- c. In the Neighborhood General Zone, non-residential uses are limited to the first floor.

Figure 106-2379(e) VEHICULAR GARAGE ACCESS

(6) *Parking.*

- a. Parking shall be 2 per principal dwelling unit; 1 per apartment unit; and 1 per every 400 square feet of commercial use.
- b. Required parking shall include on street parking along the frontage.
- c. Required parking in the Neighborhood Center shall include mid-block parking, on street parking, and private parking as long as the parking spaces are within 700' of the intended use.

(7) *Lot and Building Standards Applicable to All Neighborhood Zones.* Housing types used in traditional neighborhood developments are contained in table 106-2379. Housing types and lot configurations are illustrated in figures 106-2379(a), 106-2379(b), and 106-2379(c).

**Sec. 106-2380. Civic Open Space**

Each Neighborhood Zone shall assign at least 5% of its area to appropriate types of civic open spaces. Civic open space shall be counted as part of the minimum open space required by table 106-1526. Formal activity areas are encouraged to be built into open spaces. These include fountains, formal gardens and sitting areas, gazebos or similar facilities. These should serve the residents and provide a sense of identity to the various open spaces. The concept plan and preliminary plan shall provide increasing detail on the types of structures to be provided. Six

types of civic open spaces – parks, boulevards, greens, squares, plazas, playgrounds – are permitted and shall conform to the following standards:

- (1) *Parks.* Park areas shall be designed to provide a range of unstructured recreational opportunities for the development's residents. A park may be independent of surrounding building frontages. Its landscape shall consist of paths and trails, meadows, water bodies, woodland and open shelters, all naturalistically disposed. Parks may be lineal, following the trajectories of natural corridors. The minimum size shall be ½ acres. Golf courses may be counted toward park space; however, fairways must be deleted from reserve area calculations.
- (2) *Boulevards.* A divided street with a reserve area in the center is considered a boulevard. In order to qualify as civic open space, the median shall be at least 20 feet wide feet, with a minimum area of 5,000 square feet. Such areas shall be designed to permit passive or active recreational use by the community where appropriate.
- (3) *Greens.* Greens are smaller reserve areas available for unstructured recreation. A green may be spatially defined by landscaping or building frontages. Its landscape shall consist of lawn and trees, naturalistically disposed. The minimum size shall be ½ acre and the maximum shall be 8 acres.
- (4) *Squares.* Squares are a reserve area available for unstructured recreation and civic purposes. A square is spatially defined by building frontages. Its landscape shall consist of paths, lawns and trees, formally disposed. Squares shall be located at the intersection of important thoroughfares. The minimum size shall be ¼ acre and the maximum shall be 5 acres.
- (5) *Plazas.* Plazas are a reserve area available for civic purposes and commercial activities. A plaza shall be spatially defined by building frontages. Its landscape shall consist primarily of hardscaping. Trees are optional but encouraged. Plazas should be located at the intersection of important streets. The minimum size shall be ¼ acre and the maximum shall be 2 acres.
- (6) *Playgrounds.* Playgrounds are a reserve area designed and equipped for the recreation of children. A playground should be fenced and may include an open shelter. Playgrounds shall be interspersed within residential areas and may be placed within a block. Playgrounds may be included within parks and greens. There shall be no minimum or maximum size.

#### **Sec. 106-2381. Traditional Neighborhood Thoroughfare Standards**

- (a) *General Standards.*
  - (1) Thoroughfares are intended for use by vehicular and pedestrian traffic and to provide access to lots and Community Reserve Areas.
  - (2) Thoroughfares shall generally consist of vehicular lanes and public frontages.

- (3) Thoroughfares shall be designed in context with the urban form and desired design speed of the Neighborhood Zones through which they pass. The public frontages of thoroughfares that pass from one Neighborhood Zone to another shall be adjusted accordingly or, alternatively, the Neighborhood Zone may follow the alignment of the thoroughfare to the depth of one lot, retaining a single public frontage throughout its trajectory.
- (4) Within the most rural zones (Neighborhood Edge), pedestrian comfort shall be secondary consideration of the thoroughfare. Design conflict between vehicular and pedestrian generally shall be decided in favor of the vehicle. Within the more urban Neighborhood Zones (Neighborhood General and Neighborhood Center), pedestrian comfort shall be a primary consideration of the thoroughfare. Design conflict between vehicular and pedestrian movement generally shall be decided in favor of the pedestrian.
- (5) The thoroughfare network shall be designed to define blocks not exceeding the sizes set forth in this chapter. The perimeter shall be measured as the sum of lot frontage lines. Block perimeter at the edge of the development parcel shall be subject to approval by the DRT.
- (6) All thoroughfares shall terminate at other thoroughfares, forming a network. Internal thoroughfares shall connect wherever possible to those on adjacent sites. Cul-de-sacs shall be subject to approval by the DRT to accommodate specific site conditions only.
- (7) No more than 20 % of lots within any neighborhood zone shall front a passage or a shared pedestrian courtyard (bungalow court).
- (8) Curbless thoroughfares that do not have on-street parallel parking shall have a minimum asphalt width of 18' with 1' of stabilized shoulder on each side to meet emergency access standards. This standard also applies to curbless one-way thoroughfares with on-street parallel parking on one side.

(b) *Vehicular Lanes.* Thoroughfares may include vehicular lanes in a variety of widths for parked and for moving vehicles, including bicycles. The standards for vehicular lanes shall be as shown in Table 106-2381.

(c) *Thoroughfare Landscaping Standards.* The following landscaping standards apply to street trees, lawns, and other landscaping within the rights-of-way of thoroughfares within the traditional neighborhood development. Landscaping shall meet the requirements prescribed in Table 106-2381. Tree spacing may be adjusted by the DRT to accommodate specific site conditions.

(1) *Neighborhood Edge.*

- a. Landscaping shall include trees of various species, naturalistically clustered, as well as understory.
- b. The introduced landscape shall consist primarily of native species requiring minimal irrigation, fertilization and maintenance. Lawns should be minimal.

(2) *Neighborhood General.* Landscaping shall include trees planted in a regularly-spaced allee pattern of single or alternated species with shade canopies of a height that, at maturity, clears at least one story.

(3) *Neighborhood Center.*

- a. Landscaping shall include trees planted in a regularly-spaced, allee pattern of single species with shade canopies of a height that, at maturity, clears at least one story. At retail frontages, the spacing of the trees may be irregular, to avoid visually obscuring the shopfronts.
- b. Streets with a right-of-way width of 40 feet or less shall be exempt from the tree requirement.

### **Sec. 106-2382. Workforce Housing**

A minimum of 10% of the dwelling units in a Traditional Neighborhood Development shall be workforce housing units. The location of workforce housing units shall be shown on the conceptual plan. A workforce housing agreement shall be submitted with the conceptual plan that delineates how the TND will meet all of the requirements provided in Section 106-2382.

(a) *Location of Workforce Units.* Except as provided in Section 106-2382(g) workforce housing units shall be built on the site of the Traditional Neighborhood Development.

(b) *Timing of Development.* The workforce housing agreement shall include a phasing plan which provides for the timely development of the workforce housing units as the TND is built out. The phasing plan shall provide for development of the workforce housing units concurrently with the market rate units.

(c) *Unit Size.* Workforce housing units shall accommodate diverse family sizes by including a mix of studio, one, two and three-bedroom units as determined by the Development Review Team.

(d) *Exterior Appearance.* Workforce housing units shall be visually compatible with the market rate units. External building materials and finishes shall be the same type and quality for workforce housing units as for market rate units.

(e) *Affordability Agreement.* Prior to issuing a certificate of occupancy, an agreement in a form acceptable to the County that addresses price restrictions, homebuyer or tenant qualifications, long-term affordability, and any other applicable topics of the workforce housing units shall be recorded with the County Register of Deeds. This agreement shall be a covenant running with the land and shall be binding on the assigns, heirs and successors of the applicant. Workforce housing units that are provided under this section shall remain as workforce housing for a minimum of 5 years from the date of initial owner occupancy for ownership workforce housing units.

(f) *Occupancy Requirement.*

- (1) *Rental Units.* Any person who occupies a rental Workforce Unit shall occupy that Unit as his or her principal residence.

(2) For-Sale Units. During the period of affordability the owner who purchases a for-sale workforce housing unit shall occupy that unit as his or her principal residence.

(g) Provision of Workforce Housing Units Off-Site. If it is not feasible to develop workforce housing units within the TND, an applicant may develop, construct or otherwise provide workforce units equivalent to those required in this section off-site. All requirements of this ordinance that apply to on-site provision of workforce units, shall apply to provision of off-site workforce units. In addition, the location of the off-site units to be provided shall be approved by the Development Review Team as an integral element of the review and approval process. Off-site units may be located in a neighboring municipality.

(h) Fees-in-Lieu-of Workforce Housing Unit Provision. An applicant may opt to contribute to an established local housing trust fund to be used for the development of workforce housing in lieu of constructing and offering workforce units within the locus of the proposed development or off-site. The fee will be calculated as the amount required to provide the workforce housing unit discount necessary to make the unit workforce (e.g. median sale price of market rate unit minus maximum sale price of a three-bedroom workforce dwelling unit). Fees in lieu of unit payments shall be made according to the schedule set forth in Section 106-2382(b).

(i) Restrictions on Resale. Each workforce unit created in accordance with this ordinance shall have limitations governing its resale. The purpose of these limitations is to preserve the affordability of the unit and to ensure its continued availability for workforce income households. The resale controls shall be established through a restriction on the property and shall be in force for a period of five (5) years. Sales beyond the initial sale to a qualified workforce income purchaser shall include the initial discount rate between the sale price and the unit's appraised value at the time of resale. This percentage shall be recorded as part of the restriction on the property noted in Section 106-2382(e). For example, if a unit appraised for \$100,000 is sold for \$75,000 as a result of this ordinance, it has sold for 75 percent of its appraised value. If, several years later, the appraised value of the unit at the time of proposed resale is \$150,000, the unit may be sold for no more than \$112,500--75 percent of the appraised value of \$150,000.

### **DIVISION 3. LOT AND BUILDING STANDARDS FOR PLANNED, ~~COMMUNITY~~ USE AND MULTIFAMILY HOUSING DEVELOPMENTS**

#### **Sec. 106-2406. Scope.**

Housing types used in planned ~~and community developments~~ or multifamily housing are contained in table 106-2406. Housing types and lot configurations are illustrated in figure 106-2406. The requirements for a mix of dwelling units are contained in table 106-2408. The following explanations describe the columns for table 106-2406; see sections 106-13 through 106-18 for the full and complete definitions of these terms.

TABLE 106-2406. LOT AND BUILDING STANDARDS FOR PLANNED, ~~COMMUNITY~~

## AND MULTIFAMILY HOUSING DEVELOPMENTS

### **Sec. 106-2408. Dwelling unit mix requirements.**

All planned ~~and community~~ developments shall meet the mix requirements (table 106-2408) regarding the number of different dwelling unit types that must be provided. The mix provides a variety of housing types to meet all residents' needs. If the development is to be phased, each phase shall contain a share of the largest unit types generally proportional to the percentage of the total dwelling units. Where more unit types are provided than required, the developer may determine the percentage of those types to be provided.

## ARTICLE V. USE REGULATIONS

### DIVISION 1. GENERALLY

#### Sec. 106-1097. Uses generally.

(a) All land uses or structures shall be permitted in zoning districts only as indicated in this division. All uses are subject to ZDA or DRT approval except placement of a single-family house on a single lot, which is subject to all applicable county building codes. Prohibited uses in any district shall not be permitted. The following symbols are used in table 106-1098:

(1) "Y" indicates a permitted use, where the use is permitted as a matter of right subject to all performance standards.

(2) "N" indicates a prohibited use.

(3) "L" indicates a use whose permission is limited, depending on locational, design, or other criteria of division 2 of this article being met for the proposed site. Not all properties may meet these requirements, thus limiting the sites upon which the use may be built.

~~(4) "LC" designates a limited use that is permitted only in one of the residential community use options, meeting all other criteria of division 2 of this article and community design standards in division 2 of article XI of this chapter.~~

(4) "TND" designates a limited use that is permitted only in the Traditional Neighborhood Development option, meeting all other criteria of division 2 of this article and the standards in division 2 of article XI of this chapter.

(5) "S" indicates a use permitted only if a special use permit is approved by the zoning board of appeals per subdivision IV of division 3 of article III of this chapter. The use must conform to the locational, design, or other conditions of division 2 of this article. Not all properties may meet these requirements, thus limiting the sites upon which the use may be built.

(b) Military (M) district permissions are not included since regulation of these lands is not under the jurisdiction of the county.

#### Sec. 106-1098. Use table.

According to generalized land uses, table 106-1098 lists the type of use permission in each district, as well as definitions for each use listed. References for additional limited and special use standards are also contained in this table and are detailed in division 2 of this article. Should a use not be identified in sections 106-13 through 106-18 or table 106-1098, refer to division 4 of article III of this chapter pertaining to administrative interpretations. See articles V, VI and VII of this chapter for additional standards.

Group home	Y	Y	N	N	N	N	N	Y	Y	Y	N	N.A.	A building that would otherwise be categorized as a single-family home, except for the fact that the number of unrelated individuals living in the unit does not qualify under the definition of family. The operation of a group home shall be self-operating and controlled by the residents in a family living environment, as opposed to an institutional environment, whereby operations are mainly controlled by a professional staff. If the unit would otherwise qualify as other types of dwelling units defined in this chapter, such as apartment or attached housing, then the use shall be treated as such.
													Not included are co-ops, nursing homes, other institutional residential and boardinghouse types of operations since these are institutional or commercial lodging uses.

	U	S	CR	CS	RD	LI	IP	R	RR	RB	RC		
Manufactured home community	L	L	N	N	N	N	N	L	N	N	N	106-2409	A parcel of land planned and improved for the placement of three or more manufactured homes for use as residential dwellings where home sites within the development are leased to individuals who retain customary leasehold rights. Subdivision of land as a single-family detached, single-family cluster, family compound, planned community or small single-family affordable land use and intended for fee-simple sale of lots for manufactured homes does not constitute it being defined under this use. For purposes of this definition, a manufactured home is a residential dwelling built in accordance with the Federal Manufactured Home Construction and Safety Standards (FMHCSS). This does not include recreational vehicles, travel trailers or motorized homes licensed for travel on highways, nor manufactured housing units designed and built to meet applicable requirements of the South Carolina Modular Buildings Construction Act.
Small single-family, affordable	L	L	N	L	N	N	N	N	N	N	N	106-2104	An affordable residential unit especially designed and built to serve the needs of individuals or small households who need small, compact, affordable housing. It is not intended to meet the needs of large families. Three types of housing are provided: (i) single-family detached one story, (ii) single-family detached two story, and (iii) single story attached. The small scale of these units permits them to fit into existing neighborhoods without threatening the neighborhood character.
Accessory dwelling unit	L	L	N	N	N	N	N	L	L	L	N	106-2106	A second dwelling unit either in or added to an existing single-family detached dwelling, or in a separate accessory structure on the same lot as the main dwelling, for use as a complete, independent living facility.

**INSTITUTIONAL USES**

Assembly and worship, large	L	L	Y	L	N	N	N	L	N	L	N	106-1246	Museums, libraries, aquariums, cultural or arts centers, historic sites and churches with or without schools (except Sunday schools occupying no more than 50 percent of the floor area) as part of the complex and having 15,000 or greater square feet of floor area. (NAICS 6111, 8131, 8134) Places of worship may establish "on-site" social programs such as health care, food banks, child care, and the like as accessory uses in the principal structure and/or auxiliary buildings. These uses must be nonprofit. The sum of all principal and accessory structures may not exceed the allowable floor area ratio for the use / district. Additionally, the floor area of all accessory uses may not exceed the floor area of the principal building. (NAICS 624210, 624410, 813212, 8134)
Assembly and worship, small	Y	Y	Y	Y	N	N	N	L	L	L	N	106-1247	Museums, aquariums, cultural or arts centers, historic sites and churches with no schools (except Sunday schools occupying no more than 50 percent of the floor area) as part of the complex and having less than 15,000 sq. ft. of floor area. In the rural district, there shall be no minimum lot size for this use when less than 15,000 sq. ft. of floor area, and/or when no school is involved. (NAICS 6111, 8131, 8134) This use includes all cemeteries. (NAICS 81222) Places of worship may establish "on-site" social programs such as health care, food banks, child care, and the like as accessory uses in the principal structure and/or auxiliary buildings.
