

Protect Your Family and Our Water Resources From Household Chemicals

Southwest Florida
Water Management District

A little pollution here. A little pollution there. An old oil can tossed aside. Solvents rinsed down the drain. A dead car battery set outside the shed. Individually, it may not sound like much. But combined with all the other items improperly thrown away every day, these discarded chemicals and other hazardous waste add up to one of the biggest causes of water pollution in Florida.

With a little knowledge and a little planning, you can become part of the solution. Let's start by clarifying what are "hazardous household products."

Typically these are chemicals found in products labeled combustible, corrosive, flammable, ignitable or toxic. They are usually common products that are used in the home daily. Oftentimes, people do not realize that these everyday staples may be hazardous to humans, fish, animals or plants if spilled or not disposed of properly.

Learning about these products and how to handle and dispose of them properly will help to ensure your health and, at the same time, protect Florida's limited water resources.

Here's How to Work with Hazardous Household Products:

- Reduce your dependence on these potentially hazardous substances by using environmentally friendly substitutes.
- Always read and follow use and disposal instructions for all chemical products.
- Buy only what you need. Use what you buy. If you have leftovers, give them to someone who can use them.
- Dispose of unused hazardous household waste properly.

Your community has a collection and waste management program that offers a safe and

free way to dispose of or recycle "household hazardous waste." Listed within this brochure are the county collection centers within the 16-county area of the Southwest Florida Water Management District. Each center has a free drop-off day at least once a year and, in many counties, this option is available several times a year. This service is for county residents only and does not apply to the disposal of waste generated by businesses. There are programs for businesses, but the rules vary from county to county. Contact your local waste management facility to find out information on collection dates and times.

It is illegal to dump toxic chemicals or waste into storm drains or anywhere else that may expose waste in the environment. To report illegal dumping, call your local storm water or environmental management department or the Florida Department of Environmental Protection Waste Management Division.

For information on how to dispose of your hazardous household chemicals, contact the following:

Charlotte County
Hazardous Waste Inspector
Charlotte County Environmental Services
Department
27221 Beech Craft Ave.
Punta Gorda, FL 33982
(941) 639-1802 • fax (941) 639-0987

Citrus County
Hazardous Waste Collection Center
230 W. Gulf to Lake Highway (SR44)
Lecanto, FL 34460
(352) 746-5000 • fax (352) 527-5374

Desoto County
Hazardous Waste Project Manager
Department of Environmental Services
3268 S. W. Dishong Ave. • Arcadia, FL 34266
(863) 993-4826 • fax (863) 993-2068

Hardee County

Hazardous Waste Project Manager
Hardee County Solid Waste

685 Airport Road • Wauchula, FL 33873
(863) 773-5089 • fax (863) 773-3907

Hernando County

Hazardous Waste Project Manager
Hernando County Waste Management Division

14450 Landfill Road • Brooksville, FL 34614
(352) 754-4112, ext. 112 • fax (352) 754-4118

Highlands County

Hazardous Waste Project Manager
Highlands County Solid Waste Department

6000 Skipper Road • Sebring, FL 33870
(863) 655-6477 • fax (863) 655-6480

Hillsborough County

Hazardous Waste Project Manager
Hillsborough County Waste Management

601 East Kennedy Blvd., 24th Floor
Tampa, FL 33602
(813) 276-2936 • fax (813) 276-2960

Hillsborough County

Hazardous Waste Project Manager
Temple Terrace Superintendent of Sanitation

11210 North 53rd St.
Temple Terrace, FL 33617
(813) 989-7170 • fax (813) 989-7066

Lake County

Hazardous Waste Project Manager
Lake County Solid Waste Management

13130 Astatula Landfill Road • Tavares, FL 32778
(352) 343-3776, ext. 242 • fax (352) 742-3184

Levy County

Hazardous Waste Project Manager
Levy County Solid Waste

660 N. Hathaway Dr.
Bronson, FL 32621
(352) 486-5127 • fax (352) 486-5165

Manatee County

Hazardous Waste Project Manager
Manatee County Solid Waste

3333 Lena Road • Bradenton, FL 34202
(941) 795-3423 • fax (941) 741-3396

Marion County

Hazardous Waste Project Manager
Household Hazardous Waste Collection Center

5601 S.E. 66th St. • Ocala, FL 34480
(352) 245-6530 • fax (352) 245-6530

Pasco County

Hazardous Waste Project Manager
Pasco County Government Utilities

7530 Little Road, Suite 204
New Port Richey, FL 34654
(727) 847-8041 • fax (727) 847-8064

Pinellas County

Hazardous Waste Project Manager
Pinellas County Solid Waste Operations

3095 114th Avenue North
St. Petersburg, FL 33716
(727) 464-7565 • fax (727) 464-7713

Polk County

Hazardous Waste Project Manager
Polk County Pollution Control & Recycling

10 Environmental Loop
Winter Haven, FL 33880
(863) 284-4319 • fax (863) 284-4321

Sarasota County

Hazardous Waste Project Manager
Sarasota County Hazardous Waste Management

8350 Bee Ridge Road • Sarasota, FL 34241
(941) 316-1301 ext. 202 • fax (941) 316-1300

Sumter County

Hazardous Waste Project Manager
Sumter County Public Works

319 East Anderson Ave. • Bushnell, FL 33513
(352) 793-0240 • fax (352) 793-0247

To report illegal disposal of hazardous chemicals call:

Florida Department of Environmental Protection

(813) 744-6100 (Tampa)
(941) 332-6975 (Ft. Myers)
(407) 894-7555 (Orlando)

For information on local oil recycling sites, call 1-800-741-4337.

For information on local collection sites for biomedical waste items, call your local county health department or environmental department.

The District does not discriminate upon the basis of any individual's disability status. Anyone requiring reasonable accommodation under the ADA should contact the Communications and Community Affairs Department at (352) 796-7211 or 1-800-423-1476 (Florida only), extension 4757; TDD only 1-800-231-6103 (Florida only).

Protect Your Family and Our Water Resources From Household Chemicals

Looking for alternatives to hazardous household chemicals?

You can mix your own. As with commercial preparations, use your homemade cleaners with care and be patient. Many may not work as quickly as commercial products. The benefit to you is easier disposal of leftovers and containers, combined with a healthier environment for you and your family.

- **Aerosols:** Use pump-spray or other nonaerosol versions of cleaning and grooming products.
- **Air freshener:** Open a window or use an exhaust fan — or both. Sprinkle baking soda in odor producing areas or set vinegar out in an open dish. Place an open box of baking soda in the refrigerator to absorb food odors.
- **Ceramic tile cleaner:** Measure 1/4 cup baking soda, 1/2 cup white vinegar and 1 cup of ammonia into a bucket. Add a gallon of warm water and stir until baking soda dissolves.
- **Disinfectant and germicides:** Wash items with soap and water or wash with borax or sodium carbonate (washing soda) in water.
- **Drain cleaner:** Prevent clogging by covering drains with screen to keep out grease, food scraps, and hair. To loosen blockage, mix 1 cup each of baking soda, salt and white vinegar and pour down the drain. Wait 15 minutes. Flush drain thoroughly with boiling water. Use rubber plunger or plumber's snake if drain is seriously clogged.
- **Floor wax and strippers:** To polish linoleum and vinyl floors without commercial wax, mix 1 part thick boiled starch with 1 part soap suds. Rub the mixture on the floor and polish dry with a clean, soft cloth. To remove old wax, pour a small amount of club soda on a section of floor. Scrub well. Let soak for a few minutes, then wipe clean.
- **Furniture polish:** Use olive oil, 100 percent lemon oil, beeswax, or beeswax and olive oil. You also can mix 2 teaspoons lemon oil and 1 pint mineral oil in a spray bottle.

- **Glass cleaner:** Measure 3 tablespoons ammonia, 1 tablespoon vinegar, and 3/4 cup water into a clean spray bottle. May also use a solution of 2 tablespoons of vinegar in a quart of water.
- **Mothballs:** Place cedar chips or sprigs of dried tansy around clothes or store clothes in a cedar chest.
- **Oven cleaner:** After oven cools, wipe away grease and spills. Clean charred spills with a nonmetallic bristle brush. To remove baked-on grease and spills, scrub with a baking soda, salt and water paste. Or sprinkle with dry baking soda, then scrub with a damp cloth after 5 minutes. (Don't let baking soda touch wires or heating elements.) Scour racks and burner inserts with steel wool.
- **Silver cleaner:** Pour water into aluminum and enameled pan with aluminum foil covering the bottom. Fill to depth of 2 to 3 inches. Add 1 teaspoon baking soda, 1 teaspoon salt and heat until water boils. Add tarnished silver and boil 3 minutes. Remove silver, wash in soapy water, and polish dry. (Not for use on silver jewelry or flatware with hollow handles.)
- **Spot remover:** For butter, coffee, gravy or chocolate, sponge up or scrape off as much as possible, immediately. Dab with a cloth dampened with a solution of 1 teaspoon white vinegar and 1 quart cold water. For stains that have set, try a dab of full-strength white vinegar, or put paper towels underneath and apply a solution of equal parts ammonia and water.

- **Toilet bowl cleaner:** Pour 1/2 cup liquid chlorine bleach into toilet bowl. Let stand for at least 30 minutes, then scrub with a long handled brush and flush.

Hazardous Household Products

(See reverse for information about proper disposal of these products.)

- **Automotive products:** Motor oil, axle grease, battery acid, brake fluid, antifreeze, gasoline, diesel fuel, heating oil, degreasers, etc.
- **Fertilizers and pesticides:** Herbicides, fungicides, insecticides, no-pest strips, flea collars, pet shampoo, etc.
- **Household cleaners:** Spot removers, furniture polishes, deodorizers, drain cleaners, oven cleaners, disinfectants, moth repellants, ammonia, etc.
- **Maintenance supplies:** Paint, varnish, lacquer, turpentine, wood stains, wood preservatives, asphalt, asbestos, roofing tar, swimming pool chemicals, etc.
