PRESENTATION / FY 2015 COMPREHENSIVE ANNUAL FINANCIAL REPORT

Mrs. Bonnie Cox, CPA, Partner, and Mrs. Jessica Cawley, CPA, Senior Manager, reported Cherry Bekaert, LLP has issued a clean audit opinion on the financial statements for the year ending June 30, 2016. Management has implemented recommendations and new accounting standards. Management has issued agreed-upon procedures report for the S.C. Department of Disabilities and Special Needs. The airport passenger facility charge (PFC) audit is completed and in partner review. The Fiscal Year 2015 Comprehensive Annual Financial Report (CAFR) was submitted to
the Generally Accepted Auditing Standards (GFOA) by the January 31, 2016 extended deadline. Management has proactively implemented prior year GFOA reviewer comments as well as new accounting standards.

Cherry Beckeart is required to present an audit communication, audit results, and recommendations for the County in accordance with the GFOA standards. Further, to express an opinion about whether the financial statements are fairly presented in all material respects and in conformity with generally accepted accounting principles, to consider internal control, no assurance provided, and to furnish an overall outcome either an unmodified opinion or “clean” opinion.

Cherry Bekaert encountered no significant difficulties in dealing with management in performing and completing our audit. There were no disagreements with management during our audit procedures. There were no transactions entered into by the County during the year for which there is a lack of authoritative guidance or consensus. The change in the accounting estimate for post-retirement healthcare benefits offered to retirees, reported as a “special item,” has a current year impact of $28.8 million increase in net position. Significant estimates included in the financial statements encompass allowance for doubtful accounts, depreciation of capital assets, other post-employment benefits and net pension liability. We have obtained certain representations from management that were included in the management representation letter. To our knowledge, there were no consultations with other accountants.

GASB Statement No. 68 and 71 – Cherry Bekeart reported a new accounting standard effective FY 2015. The primary objective of this Statement is to improve accounting and financial reporting by state and local governments for pensions. It significantly changes pension accounting for accrual basis financial statements. It has no effect on governmental fund statements. Changes focus from the income statement approach to focus on annual required contributions and adequacy of funding required contributions. It requires pension liability or asset recorded on the Statement of Net Position and a restatement of beginning net position of approximately $91.0 million and expanded disclosures and Required Supplementary Information.

PRESENTATION / COLLECTIONS REPORT

Mrs. Maria Walls, County Treasurer, stated the balance of unrestricted cash on hand is $189,069,999 and restricted cash $68,643,989. Effective January 15, 2016 the amount collected totaled $340,937,828 and, as of February 15, 2016, the amount collected totaled $344,209,868. Next, Mrs. Walls identified the core values of the office -- innovation, efficiency, pleasantness, ownership, excitement, empowering staff, encouraging ownership, and cultivating leadership.

INFORMATION ITEMS

4. Update / Lowcountry Council of Governments

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Ms. Sabrena Graham, Executive Director, Lowcountry Council of Governments (LCOG), provided the Committee with an overview of historical payments from Beaufort County, the LCOG Annual Financial Report for the year ended June 30, 2015, as well as an overview of the services provided by the LCOG. The $0.60 per capita dues assessment, from the four counties providing funding to LCOG, has not changed in 20 years. LCOG is requesting increasing the dues to $0.75 per capita which would increase Beaufort County’s dues from $97,000 to $120,000 annually. Beaufort County receives a greater return on investment. LCOG services include the Senior Services Program, Community/Economic Development Program, Home Program, Workforce Development Program, as well as the completion of two Joint Land Use Studies (JLUS) together with the Beaufort County Planning Department.

Status: Information only.

5. Update / Lowcountry Area Volunteer Income Tax Assistance (VITA) Coalition

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Mr. Fred Leyda, Director, Human Services Alliance, introduced Ms. Danielle Breidunt, Program Coordinator, Lowcountry Area Volunteer Income Tax Assistance (VITA), who provided the Committee with a PowerPoint presentation on VITA. Vita is an IRS program that provides free tax help to people who make less than $54,000, people with disabilities, and people who are limited English speaking and need assistance in preparing their tax return. She provided an
overview of the areas served by VITA in the Lowcountry, as well as an overview of the 2015 social and economic impact. In 2015, 45 IRS certified volunteers spent 3,008 hours operating 11 VITA sites and filing 2,197 tax returns. The average tax refund was in the amount of $1,320, and totaled $3,035,871 to local taxpayers’ pockets. So far in 2016, 46 IRS certified volunteers have spent 1,129 hours operating 11 VITA sites and filing 641 tax returns. The average refund thus far is $2,100 and as of February 2016, $1,221,708 has been returned to local taxpayers’ pockets. Ms. Breidunt also provided an overview of new and improved initiatives for 2016 which were as follows:

- EITC Events in January
- Self-Prep Stations
- Drop-off tax preparation
- VITA-specific phone number and email address
- Paperless program administration: e-newsletter, volunteer sign-up sheets and timesheets, training and shared resources

**Status:** Information only.

6. **Update / Interim Agreement with Love House Learning Academy to Provide After School Programming and Senior Citizen Services for a Six-Month Trial Basis**

**Notification:** To view video of full discussion of this meeting please visit [http://beaufort.granicus.com/ViewPublisher.php?view_id=2](http://beaufort.granicus.com/ViewPublisher.php?view_id=2)

**Discussion:** Mr. Phil Foot, Assistant County Administrator-Public Safety, provided the Committee with a historical overview of this item. The Parks and Leisure Services (PALS) Department was previously operating the After School Program and Senior Services Program. Staff decided to outreach these programs to more qualified organizations. PALS reached out to Love House Learning Academy and asked if they would be interested in facilitating these two programs. Beaufort County has been in agreement with Love House Learning Academy and, the programs, to date, seem to be working well. Going forward the County will issue a Request for Proposal to facilitate these two programs.

Ms. Shannon Loper, Interim Director, Parks and Leisure Services Department, provided an overview of the two Programs.

**Senior Program**
- Scott Center – 15 individuals
- Booker T. Washington Center – 15 individuals
- Port Royal Center – 21 individuals
- Broomfield Center – looking at adding this facility

**After School Program – 173 individuals**
- Dale Center – newly added facility
- Seaside Center - coming soon
- Summer camp – increase of 100 participants
- Transportation – worked with school district to provide transportation through the current bus route

Mr. McBride inquired as to why there are no programs offered at the St. Helena Island gym.

Mrs. Loper said there was an after school program at that location, but the participants dwindled. She said they can look at the possibility of including the facility into the Program.

Mrs. Theresa Roberts, Love House Learning Academy, provided information on the $1.00 a day program, summer learning program, bus routes, nine program facilities, and enrollment growth.

**Status:** Information only.
The Natural Resources Committee met Monday, March 7, 2016 beginning at 2:00 p.m., in Council Chambers, Administration Building, Beaufort County Government Robert Smalls Complex, 100 Ribaut Road, Beaufort, South Carolina.

ACTION ITEMS

1. Approval of an amended Memorandum of Understanding between the County and USC-Beaufort for the Water Quality Monitoring Services

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Mr. Eric Larson, Division Director-Environmental Engineering, reviewed this item with the Committee. Staff is requesting Council to approve this amended Memorandum of Understanding between Beaufort County and USC-Beaufort for water quality monitoring services:
(1) sampling and analysis services; (2) Stormwater meeting attendance, input into Monitoring Plan, and Annual Report generation; and (3) USCB Water Quality Laboratory Assays.

**Main motion:** It was moved by Mr. Stewart, seconded by Mr. Fobes, that Natural Resources Committee approve and recommend to County Council approval of an amended Memorandum of Understanding between Beaufort County and USC-Beaufort for water quality monitoring services. The vote: YEAS – Mr. Dawson, Mr. Flewelling, Mr. Fobes, Mrs. Howard, Mr. McBride, Mr. Sommerville, Mr. Stewart, and Mr. Vaux. The motion passed.

**Recommendation:** Council approve an amended Memorandum of Understanding between Beaufort County and USC-Beaufort for water quality monitoring services.

2. **Consideration of Contract Awards and Recommendations / Consideration of Contract Award for Beaufort County Crystal Lake Park Renovation Services**

**Notification:** To view video of full discussion of this meeting please visit [http://beaufort.granicus.com/ViewPublisher.php?view_id=2](http://beaufort.granicus.com/ViewPublisher.php?view_id=2)

**Discussion:** Mr. Dave Thomas, Purchasing Director, reviewed this item with the Committee. The Crystal Lake Park is a 24.79 acre passive park that contains an existing 3,100 square foot metal building. This phase of the park project is designed to repurpose the existing Butler Marine Building into office lease space for the Beaufort County Open Land Trust, South Carolina Soil Conservation Service, and the Friends of Crystal Lake. Staff is recommending that the park provide an additional amenity, for example a pavilion, for community meetings and events. On January 29, 2016, Beaufort County received one response from a qualified contractor for Beaufort County’s Crystal Lake Park Renovation Services.

Staff reviewed the bid and determined that Beaufort Construction was responsive to the bid requirements, compliant with our Small and Minority Business Participation requirements, and a fair and reasonable offer. The grand total for the project, including the 5% contingency, is $802,637.

Mr. Fobes inquired as to the high cost of renovations.

Mr. Gruber will provide Council with the bid documents that will provide a breakdown of costs.

**Main motion:** It was moved by Mrs. Howard, seconded by Mr. McBride, that Natural Resources Committee approve and recommend to Council a contract award to Beaufort Construction, Beaufort, South Carolina in the amount of $764,417, plus a 5% contingency of $38,220, for a total contract cost of $802,637 for Crystal Lake Park Renovation Services. Funding will come from account 45000011-54411, Rural and Critical Lands Real Property Program, Professional Services. The vote: YEAS – Mr. Dawson, Mr. Flewelling, Mrs. Howard, Mr. McBride, Mr. Stewart, and Mr. Vaux. NAYS – Mr. Fobes. The motion passed.
Recommendation: Council award a contract to Beaufort Construction, Beaufort, South Carolina in the amount of $764,417, to include a 5% contingency of $38,220, for a total contract cost of $802,637 for the Crystal Lake Park Renovation Services. Funding will come from account 45000011-54411, Rural and Critical Lands Real Property Program, Professional Services.

3. Southern Beaufort County/Daufuskie Island Planned Unit Development (PUD) Master Plan Change Request For R800 027 00A 0076 0000, R800 027 00A 0078 0000, R800 027 00A 0085 0000, and R800 027 00A 0092 0000 (179.99 Acres Known as Bloody Point Planned Unit Development (PUD); Owner/Applicant: Bloody Point Properties, LLC / Agent: Mark Baker, Wood+Partners, Inc.

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Mr. Tony Criscitiello, Planning Director, reviewed this item with the Committee. Bloody Point Planned Unit Development was first approved in 1989 and last amended in 2007 to include the following: 199 single family units within 227 acres; 7,500 square feet of commercial space; a cemetery; and an 18-hole golf course.

The purpose of this proposed Planned Unit Development (PUD) amendment is to convert the 180 acre golf course into a resort complex containing the following: an Inn district that would include a 60 room inn/hotel with 7 additional rooms at the existing Osprey Cottage; and a Resort/hospitality district that would permit 150 single family, duplex and triplex units. The Bloody Point PUD is identified on the Daufuskie Island Plan as a G5 Conventional Infill/retrofit Sector. What this means is that over time this PUD is supposed to transition into a transect-zoned, pedestrian-friendly development that blends into the island. The proposed residential density for the 180 acre golf course site is 1 unit per acre, which is consistent with the rural zoned areas of the island. The staff report mentioned the fact that the PUD amendment is in keeping with the resort character of the Bloody Point Development. Also, the proposed clustering of small units throughout the golf course property will enhance the eventual conversion of the development to transect zones and a pedestrian friendly environment. From a stormwater and resource protection standpoint, the PUD amendment meets the Community Development Code (CDC) requirements. Finally, the PUD amendment did not trigger the requirements for a Traffic Impact Analysis because of the self-contained nature of the development.

Mr. Mark Baker, President, Wood+Partners Inc., provided the Committee with a PowerPoint presentation to include the background of the project, as well as visual demonstrations of existing conditions and the Conceptual Master Plan.

Motion: It was moved by Mr. Fobes, seconded by Mr. McBride, that Natural Resources Committee approve and recommend to Council approve on first reading a Southern Beaufort County Bloody Point Planned Unit Development (PUD) Master Plan amendment for R800 027 00A 0076 0000, R800 027 00A 0078 0000, R800 027 00A 0085 0000, R800 027 00A 0092 0000, R800 027 00A 0092 0000 (179.99 acres). The vote: YEAS – Mr. Dawson, Mr. Flewelling, Mr. Fobes, Mrs. Howard, Mr. McBride, Mr. Stewart and Mr. Vaux. The motion passed.
Recommendation: Council approve on first reading a Southern Beaufort County Bloody Point Planned Unit Development (PUD) Master Plan amendment for R800 027 00A 0076 0000, R800 027 00A 0078 0000, R800 027 00A 0085 0000, and R800 027 00A 0092 0000 (179.99 acres).

INFORMATION ITEMS

9. Consideration of Contract Awards and Recommendations / Reconsideration of a recommendation to allow County Administrator to enter into agreement with Academy Park, LLC for a partnership to develop a Regional Stormwater Facility in Rock Springs

   Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

   Discussion: Mr. Joshua Gruber, Deputy County Administrator / Special Council, reviewed Draft Agreement dated March 7, 2016 and he, as well as Mr. Eric Larson, Division Director-Environmental Engineering, responded to questions from the Committee. Questions and concerns of the Committee were as follows:

   - Who is Academy Park, LLC
     - Academy Parks, LLC consists of three parcels of land. One parcel is owned by Robert Sample. The other two parcels are not owned by Mr. Sample; but, he is the registered agent and has provided ownership documentation.
   - Questions relative to the permitting and whether or not the project can move forward before permitting is received.
     - No activity can occur until all permits are received.
   - Is there a bonding requirement in the agreement?
     - The applicant asked that the bonding requirement be removed due to this project being identified in the Stormwater Master Plan and the fact that the County will be moving forward with a stormwater project regardless, within the same vicinity. Mr. Gruber stated bonding is a question of who will be paying for a project, because regardless a project will be done.
Questions from the Committee regarding whether the County would be considering this exact project and if this is the best location for this stormwater project.
   - No analysis has been done relative to other probable locations, but much of the area is developed.

What is the typical timing for receiving a permit from the U.S. Army Corps of Engineers?
   - From 30 days to several months. If the project is bonded, the applicant does not need permits to begin the process. If it is not bonded, the applicant must have all permits before starting the project.

If the owner is willing to sell the property after selling the dirt, would it not be easier for the County to buy the property and sell the dirt?
   - The reason the Stormwater Master Plan dated this project for 2022, is because the County currently does not have the dollars for said project.

Does the construction of this Stormwater pond move the County closer to its goal?
   - Yes. Two feasibility studies have been submitted that demonstrate such.

What is the cost to route the water to the pond, and then outflow to the ditches?
   - Staff did not know the exact cost, but will refine the number.

Public Comment:

Mr. Richard Bolin, a resident of Academy Estates, stated this project ignores the fact that the pond in Bluffton that enters the headwaters of the May River has zero effect. At the last Stormwater Utility Management Board meeting, Mr. Jimmy Richey agreed with Mr. Reed Armstrong that the water, leaving the pond is clean, but the bacteria increases so much following the ditch, as if the pond was not installed. Mr. Andy Kinghorn’s explanation as to why, is that the fresh water introduced into the ditch causes the bacteria to spike. The bacteria in the ditch reproduce faster than if freshwater had not been there. Why was this information left out of the feasibility study? Why did the feasibility study not include the New River facts? It was to persuade the people that they will save dollars, when they will not. Do not take this item out of the Stormwater Management Utility Board.

Mr. Larson responded to Mr. Bolin’s comments. New River was not part of the feasibility study because it is not part of this watershed. The pond at New River is being effective. Also, he stated that much of the comments from the Stormwater Board are being taken out of context. We are cleaning water to zero bacteria then merging with other sources. The average colony, per 100 mil, going into the pond, is 1,900. The average leaving the pond is 100 per 100 mil. The average, per 100 mil, going into the marsh, is 1,700. It would be 3,500 had the pond not been constructed. Also, he stated he is not aware of any research stating clean water causes bacteria to grow.

Mrs. Michelle Bolin, a resident of Academy Estates, stated Beaufort County is entering into an agreement with USC-Beaufort for water quality which she feels is a waste of $100,000 of taxpayer dollars. We have data saying upstream does zero good, yet are being told to disregard scientific data and instead rely on computer models. If Beaufort County is willing to spend $600,000, over the next 5 years, then the County should be willing to accept the knowledge. It is a waste of taxpayer dollars. Also, this new contract was not posted on the County’s agenda.
Since it was not provided 24 hours prior to the meeting a vote should not be taken. The location of the pond should be voted on by the Stormwater Management Utility Review Board.

Mr. David Precock, a resident of Academy Estates, wanted to know what happens if the applicant dismisses the bond and is not able to finish. What happens to the pond? There is potential that we could be stuck with an incomplete whole in the ground. The County is salivating at the thought of a free pond. Are we looking at what is best for the County? Is this the best possible place? Are we protecting the watershed the best that we can?

Mr. Joe Courtney, a resident of Academy Estates, stated phase one of the plan effects Academy Estates, a 40 year old established neighborhood. The entire neighborhood is against this. Of the $1.5 million said savings by just this one pond, only $200,000 is set aside in the breakdown, to purchase property, and then $800,000 for the removal of dirt and to get rid of it. No one has mentioned selling it. The County might be able to make money on this. He suggests buying property closer to the marsh, digging the dirt and selling the dirt. How much would that cost of the taxpayers? There are multiple properties available. Has the county contacted those property owners? No.

Mr. Robert Sample, Academy Park, LLC, stated there are only two other properties available for construction of such pond. One of which is a triangle on the marsh that is a maximum of three acres. The other is in Academy Estates subdivision. Why is it not appropriate for my site, but it would be appropriate on the other 5 acre site within the subdivision? He also stated, Mr. Coleman approached the County and was in negotiations long before his initial proposal. He stated he will get a bond if that is what is needed to move forward. The County needs to be sharing the risk since he is giving the site for $1.00. It is the right thing to do.

Recommendation of Committee:
- Tighten up language within the agreement, specifically chronology
- Discuss inclusion of a surety bond
- Provide before and after measurement data from other areas with this type of facility

Status: Information only.

10. Consideration of Contract Awards and Recommendations / Reconsideration of a recommendation to allow County Administrator to enter into agreement with David Coleman, property owner, for a partnership to develop a Regional Stormwater Facility in the Rock Springs Creek Watershed

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Mr. Joshua Gruber, Deputy County Administrator / Special Council, reviewed Draft Agreement dated March 7, 2016 and he as well as Mr. Eric Larson, Division Director-Environmental Engineering, responded to questions from the Committee. Questions and concerns of the Committee were as follows:
Why does this agreement give six years for completion?
  o Six years would match the date in the Master Plan. The dirt is valuable as long as you do not have to take it long distances. If the market for the Walmart site goes away, enforcing this would cost the landowner.

Why does the language in agreement say “submit to local government” and not Staff Review Team (SRT) which is what the Academy Estates agreement says?
  o The language is meant to be the same.

Why is the section on tree mitigation different from that of the Academy Estates agreement?
  o The intent was to contribute to each of the projects in different ways.

Why does this agreement contain language relative the owner obtaining liability insurance?
  o This is an easement, not fee owner.

Status: Information only. Staff was asked to tighten up the language within the agreement.

11. Discussion / Tree Protection Standards

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Mr. Tony Criscitiello, Planning Director, reviewed with the Committee the current language included in the Community Development Code as it relates to tree protection.

Status: Committee asked that staff study the matter and recommend changes.

12. Discussion / Natural Resources Committee Meeting Dates

Notification: To view video of full discussion of this meeting please visit http://beaufort.granicus.com/ViewPublisher.php?view_id=2

Discussion: Committee Chairman Brian Flewelling addressed the need to change the meeting dates of the Natural Resources Committee to the third Monday of the month. This would be a flip with the currently scheduled Finance Committee meetings. Finance Committee Chairman Jerry Stewart stated his concern with such transition with the current budget season.

Mr. Flewelling stated the next meeting of Natural Resources will be held Tuesday, March 22, 2016 beginning at 2:00 p.m.

Status: No action taken.

This Memorandum of Understanding (the “Memorandum”) is entered into by and between Beaufort County (hereinafter referred to as the “County”) and the University of South Carolina Beaufort (hereinafter referred to as “USCB”) regarding Water Quality Monitoring Services (hereinafter referred to as “monitoring services.”)

WHEREAS, USCB operates and manages a laboratory dedicated to assessing the water quality of the Lowcountry; and

WHEREAS, the County, in pursuit of its mission to protect our water resources and implement monitoring recommended by the Stormwater Management Plan and restoration initiatives, recognized the inherent value in USCB’s offer to partner with the County and provide monitoring services; and

WHEREAS, the County may enter into additional Memorandums of Understanding with other government bodies and that services provided by USCB may be to the benefit of those other government bodies and funded by the County via this MOU; and

WHEREAS, the original agreement entered into July 23, 2013 requires updating to properly reflect changing monitoring needs by the County and changing water quality monitoring capabilities by USCB; and

WHEREAS, the County and USCB, in order to efficiently analyze and monitor the water quality of the Lowcountry, hereby agree to the following terms and conditions;

NOW, THEREFORE, for and in consideration of the mutual promises, undertakings and covenants set forth herein, the receipt and sufficiency of which is acknowledged and affirmed by the County and USCB, the parties hereto agree as follows:

1. Governing Document

It is the intent of the parties that this Memorandum shall supersede any other agreements entered between the County and USCB regarding monitoring services.

2. USCB

a. USCB shall continue to work to attain SC DHEC certification for all certifiable analyses reflected in the Assay summary herein (see Attachment 1). In the event SC DHEC certification for a water quality parameter(s) is not obtained by the time the County is required to be MS4 compliant, USCB shall be responsible to utilize a SC certified laboratory to conduct the analysis.

b. USCB shall continue to operate and manage a laboratory able to receive and analyze the County’s samples during normal hours of operation of 8:00 AM to 4:00 PM, Monday
through Friday. If extenuating circumstances occur that require certain services, such as sample receipt, outside of normal operating hours, the County should inform Laboratory personnel in advance so that accommodations can be made. Samples requiring analysis for BOD5, Chlorophyll-a and/or microbiology, must be received by the Laboratory no later than noon on Thursday.

c. All analytical results will be reported within 30 days of sample receipt. A preliminary report of completed results prior to 30 days can be issued to the County in the event of illicit discharge tracking, time sensitive projects, or when requested by the County and agreed upon by both parties. Analytical results for microbiological parameters are typically available 48 hours after sample receipt and can be conveyed to the County thereafter. Analytical results will be conveyed to the County via email, unless otherwise requested. Additional costs may be incurred for customized reporting and/or data interpretation.

d. USCB laboratory staff will make a good faith effort to be responsive to unforeseen water quality needs as they arise.

e. USCB will separately track monitoring services provided North and South of the Broad River and provide the County’s accounting office with summary reports separating such services accordingly.

f. USCB will submit to the County a summary of all monitoring activity conducted on its behalf, as well as related expenses, on January 1st and July 1st each year.

g. USCB may provide laboratory services to entities other than the County, with just compensation for said services, provided doing so does not interfere with its monitoring responsibilities to the County.

3. The County

a. The County shall issue an annual purchase order for $120,000 to USCB for sampling and analytical services and other tasks as described in Attachment 1. Payments of $60,000 will be made bi-annually by the County on January 1st and July 1st each year.

b. Any funds in excess of those required for the County’s services will be spent at the discretion of USCB laboratory staff on local water quality projects, laboratory operations including obtaining and maintaining State certifications, and equipment upgrades, replacements, and service contracts.

c. Prior to any sampling and analysis by USCB, an “Analytical Water Quality Service Request” form (see attachment 2) must be completed to ensure a mutual understanding of
requested services. Any modification to the requested services will require the completion of a new “Analytical Water Quality Service Request” form.

4. **General Requirements of the Agreement**

   a. The parties hereto intend that no master/servant, employer/employee, or principal/agent relationship will be created by this Agreement. Nothing contained herein creates any relationship between the County and USCB other than that which is expressly stated herein. The County is interested only in the results to be achieved under this Agreement, and the conduct and control of the agents and employees of USCB and the methods utilized by USCB in fulfilling its obligations hereunder shall lie solely and exclusively with USCB, and its agents and employees shall not be considered agents or employees of the County for any purpose. No person employed by USCB shall have any benefits, status, or right of employment with the County.

   b. This Agreement shall not be modified unless such modification is made by mutual consent of both parties at any time in writing and signed by both the County and USCB.

   c. USCB may not assign this Agreement to another organization without the prior written approval of the County.

5. **Default Remedies**

   In the event USCB does not remedy such conditions that have been found in violation of this Agreement with 30 days after written notice to do so is given by the County, or if insufficient progress is being made toward the remedy within those 30 days, the County may use a portion, or all, of the allocated funds to remedy the conditions.

6. **Term**

   The term of this Memorandum of Understanding shall be from the date of execution for five (5) years. The Memorandum will be reviewed by the County and USCB annually to determine funding availability for the upcoming year, as well as changes to the “Scope of Services” (see attachment 1).

7. **Termination for Convenience**

   a. In addition to any other rights to termination set forth in this Memorandum, in the event both parties mutually agree to terminate this Agreement prior to the expiration of the Term, the County shall be entitled to a pro-rata refund of the money set out in Paragraph 3a above.
b. The County shall have the right to terminate this Agreement for convenience upon 60 days written notice to USCB. In the event the County terminates this Agreement for convenience, the County shall pay the Laboratory for services performed.

IN WITNESS WHEREOF, the parties hereto have affixed their signature hereto the date first written hereinabove.

SCOPE OF SERVICES

The Scope of Services in the MOU between Beaufort County and USCB includes those activities specified in sections A and B below.

A. Sampling and Analysis Services

1. Field collection, *in situ* analysis, and laboratory-based analysis of water samples at locations and frequencies agreed upon by both parties and as reflected in the “Analytical Water Quality Service Request” form.

2. USCB shall be responsible for maintenance and repair of analytical equipment, purchasing laboratory supplies, and supplying qualified personnel to provide sampling and analytical services.

B. Stormwater Meeting Attendance, Input Into Monitoring Plan, and Annual Report Generation

1. USCB Laboratory staff shall attend monthly stormwater coordination meetings in person or via conference call, as workload allows.

2. USCB Laboratory staff shall participate in the development and routine updates of the County’s water quality monitoring plan.

3. USCB Laboratory staff shall provide an annual report comprised of cumulative analytical water quality data results spanning a 12-month period. The report will provide analytical review and conclusions on the effectiveness of the monitoring program as well as offer advice on modifications of the plan. This report is to be presented to the County within 60 days following the end of each 12-month monitoring period.

C. USCB Water Quality Laboratory Assays

1. A comprehensive list of assays currently conducted by the USCB laboratory is shown below. Should the County request an assay not among those in USCB’s list of assays, USCB will attempt to find a laboratory capable of such analysis or at its discretion, develop the capability to perform the assay through the purchase of additional equipment and supplies and receipt of additional training, as needed. Both parties will evaluate each request beyond current laboratory capability and together, determine
which party will be responsible for funding. The funding mechanism will be mutually agreed upon and may come from the original funding supplied by the County (see paragraph 3a of the Agreement), additional County funds, or a combination of the two.

SUBJ: Recommendation of Contract Award for IFB 012016, Beaufort County Crystal Lake Park Renovation Services

DATE: February 24, 2016

BACKGROUND: The Crystal Lake Park is a 24.79 acre passive park that contains an existing 3,100 square foot metal building. This is the phase of the park project that is designed to repurpose the existing Butler Marine Building into office lease space for the Beaufort County Open Land Trust, South Carolina Soil Conservation Service, and the Friends of Crystal Lake. The staff is recommending that the park provide an additional amenity, for example a pavilion, for community meetings and events. On January 29, 2016, Beaufort County received one response from a qualified contractor (Beaufort Construction) for Beaufort County’s Crystal Lake Park Renovation Services.

</tbody>
</table>

Staff is requesting a 5% contingency of $38,220 to cover any unforeseen conditions and FFE. Staff reviewed the bid and determined that it was responsive to the bid requirements, compliant with our Small and Minority Business Participation requirements, and was a fair and reasonable offer. The grand total for the project including the 5% contingency from Beaufort Construction is $802,637. This is below the Engineer’s estimate of $817,658.

FUNDING: Account # 45000011-54411, Real Property Program, Professional Services, with an available fund balance $6 million as of the date of this memo.

FOR ACTION: Natural Resources Committee meeting occurring March 7, 2016.

RECOMMENDATION: The Natural Resources Committee approves and recommends to the County Council a contract award to Beaufort Construction in the amount of $764,417 and include a 5% contingency of $38,220 for a total contract cost of $802,637 for Beaufort County’s Crystal Lake Park Renovation Services from the funding source listed above.

RE: PROJECT # 100020.05 Crystal Lake Park Renovations (IFB #012016)

Mr. Thomas,

The Engineers estimate for the Crystal Lake Park Renovations involving the Base Bid 2C (building renovation) and Alternate 2D.b. (Covered Pavilion construction) totals $817,658.00. The Bid received for this scope came in below the engineers estimate and totals $764,417.00. By adding a 5% contingency ($38,220.85), the funding for this scope should total $802,637.85.

Please contact our office at (843) 379-2222 if you have any questions or concerns.

Sincerely,

MEMORANDUM

TO: Beaufort County Council
FROM: Anthony Criscitiello, Planning Director
DATE: March 14, 2016
SUBJECT: Crystal Lake Improvements – Consistency with Energy Chapter of the Comprehensive Plan

The purpose of this memo is to emphasize that the proposed improvements to Crystal Lake Park are supported by the Energy chapter of the Beaufort County Comprehensive Plan. As you are aware, the proposed project consists of the adaptive reuse of a 3,200 square foot building to be used by the Open Land Trust, The Soil and Water Conservation, and Friends of Crystal Lake Park. The project, as designed, will utilize high efficiency mechanical systems, LED lighting fixtures, closed cell foam insulation, and solar panels for the purpose of reducing ongoing energy costs.

The Energy chapter of the Comprehensive Plan states that when addressing energy issues, achieving energy efficiency should be the first consideration, especially at the County level. When compared to the cost and effort to increase energy production, efficiency is the “low hanging fruit” of the energy equation. The Plan supports green building techniques such as low wattage lighting, more efficient HVAC systems, insulation, and solar to reduce long term energy costs. The Energy chapter urges the County to lead by example with its own building projects to encourage other local governments and private industry to do likewise.
1. Initial Design Concepts Considered:
   a. Practical adaptation of the existing 3,200 sf building to the needs of the Open Land Trust, The Soil and Water Conservation, and Friends of Crystal Lake Park.
   b. Utilization of the existing site development to satisfy the public’s access to the park.
   c. Benefits of ‘saving’ an existing structure, re-purposing it for a second generation of use rather than sending it to the land fill. This also included the consideration of demonstrating this ‘green and sustainable philosophy’ in this very public location, serving as a part of the stated goals and missions of Beaufort County’s Land Conservation Program, the Open Land Trust Mission, and certainly the Soil and Water Conservation District.

2. Additional project selections for Life Cycle Cost Benefits:
   a. Developed separate restrooms for park use
   b. Used high efficiency mechanical systems and LED lighting
   c. Used closed cell foam insulation
   d. Introduced solar array
   e. Provided covered walk for practical and aesthetic reasons
   f. Includes a substantial landscape package which extends to the park boundaries
   g. Provides a 600 sf Covered Pavilion for public use

3. Beaufort Construction Schedule of Values is for the entire project scope. Line items 3 (landscaping), 8 (exterior carpentry), 9 (Pavilion), and 22 (Solar) concern portions of the project outside of Building Costs, somewhat skewing a square foot building cost. Once this is factored, the building cost is approximately $180.00/sf. We estimate replacing this structure with a new one would add approximately $200,000.00 to the project cost.

NARRATIVE STATEMENT

A. The Property

Daufuskie Island is one of a series of Atlantic Sea Islands along the eastern seaboard of the United States. The Island, comprising of a total of approximately 5,000 acres is located in Beaufort County, South Carolina. The Island is endowed with nearly 11 miles of ocean, sound and Intracoastal Waterway frontage. Daufuskie has evidence of habitation four or five thousand years ago. While Spanish sailed near the Island in 1520, it was not until 1740 that King George II of England bestowed on David Mongin an Island in the area known as “Daufuskie”. The Island, smaller than Hilton Head, is located less than a mile to the south across Calibogue Sound. Much like its larger neighbor to the north, Daufuskie Island has enjoyed a rich history as an active plantation and farming community during the Nineteenth Century and into the early Twentieth Century. Beaufort County and Daufuskie Island are located within The Gullah/Geechee Cultural Heritage Corridor, adding cultural richness to the Island. The unique location of Daufuskie in this historic corridor, its position between Hilton Head and Savannah, and the lack of a bridge have all been factors in the preservation of its historic and rural qualities. These qualities have allowed the Island to serve as an alternative to the more developed destinations nearby.

The Bloody Point Planned Unit Development is a +/-337.1 acre tract located on the southern tip of Daufuskie Island with frontage on the Atlantic Ocean and the Mungen Creek. Bloody Point Properties, LLC owns and operates community amenities, dock and ferry service, golf facilities and parcels within Bloody Point PUD totaling +/-180 acres. These parcels, owned by Bloody Point Properties, LLC, are located in the center of the Bloody Point PUD and is bounded on the west by Mungen Creek, on the north by River Road residential lots and Pappy’s Landing Road, on the east by Beach Road, and on the southeast by Fuskie Lane and residential lots. Pappy’s Landing Road provides vehicular access to Bloody Point and the community entrance, which is located at the intersection of Bloody Point Drive and Pappy’s Landing Road. There are three roads within Bloody Point including Bloody Point Drive, River Road and Fuskie Lane. All three roads are owned and maintained by the Bloody Point Club Property Owners Association. Boat and ferry access to Bloody Point are provided at the Bloody Point Dock and Landing located on Mungen Creek. This landing has internal vehicular access to Fuskie Lane. Transportation within Bloody Point is largely accommodated by golf carts, bicycles and walking paths. Gasoline vehicles are generally limited to service vehicles and community transportation vehicles, shuttles, vans and busses.

For additional information on the Planning District refer to Exhibit A, Existing Conditions.
B. Intent of the Planned Unit Development Zoning Map Amendment

For this section, please refer to documents in Exhibit B, Site Plans.

The intent of this Zoning Map Amendment for the Bloody Point Planned Unit Development is to modify development rights for the central portion of the PUD for parcels currently owned by Bloody Point Properties, LLC to allow hospitality uses, commercial uses, single family attached and detached uses and recreational uses. As indicated above, the PUD designation already exists for Bloody Point. The parcels owned by Bloody Point Properties, LLC are located within the Bloody Point PUD and are primarily used as an existing golf course, including an eighteen-hole golf course, golf clubhouse, cart barn, inn, associated amenities, boat dock and ferry landing, beach access, swimming pool and other supporting club facilities. The current golf course operation is under-performing, as such the proposed alternate land uses can help enhance values. The proposed conceptual master plan, Exhibit B, allows for single family detached and attached dwelling units including single units, duplex units and triplex units totaling up to 150 dwelling units. Consideration may be taken to convert these to hospitality units for use with the inn. The proposal also includes an inn/hotel with up to 60 rooms in addition to the 7 rooms in the existing Osprey Cottage and up to 25,000 square feet of commercial space, open spaces with linear park, leisure trails, boardwalks, fishing docks and overlooks, a ferry landing and dock and pier, a nature center and a local food production farm and vineyard.

In order to accommodate a flexible mix of land uses in traditional village-like settlement patterns reflecting the planning principles native to the low country as outlined in the Daufuskie Island Code, this application is being submitted to provide for suitable and responsible planning and development of the property. Infill dwelling units are carefully placed in a relaxed, low density manner overlooking internal and external natural assets including tidal marshes, existing and proposed lakes, open space and greenways. Connectivity is an essential component of this plan which includes a comprehensive greenways and trails system linking both existing and proposed dwelling units across the community with the centrally located inn district and village core. Generous internal open spaces including greenways, lakes and tidal marshes separate existing homesites from proposed development while providing key pedestrian and bicycle connections to the village core while enhancing value.

This plan proposes a relaxed village-like setting drawing from Daufuskie Island’s unique qualities and characteristics while offering an alternative to conventional golf oriented amenity communities and resorts across the region. This plan supports the development of a viable and successful community with an emphasis on creating an alternative destination that builds on active, nature based recreation and protection and sustainment of the Property’s cultural and natural resources.

It is intended that the plan will allow for flexibility to accommodate specific site conditions, environmental assets, physical constraints, market conditions and design parameters. Accordingly, the exact location of boundary lines within tracts, the location of land uses indicated within planning areas and preliminary design concepts for tracts described herein shall be subject to change. Development phases within the planned area will be submitted for final plan review over the life of the development and minor changes are allowed, provided that maximum densities and land use quantities are not exceeded within the overall development plan. Major changes in the plan
including increases in overall density or land uses, will require additional PUD Zoning Map Amendments.

C. Master Plan

1. Proposed Arrangement of Land Uses

Refer to Exhibit B, Bloody Point Conceptual Master Plan.

2. Boundary Survey

Owner will be required to complete boundary survey prior to developing parcels.

Refer to Exhibit D, Boundary Survey for supporting documents.

3. Adjacent Parcel Land Uses

Refer to Exhibit E, Existing Lot, Roads, Rights-of-Way and Land Uses.

4. Site Plan

Refer to Exhibit B, Bloody Point Conceptual Master Plan.

5. Topographic Survey

Refer to documents in Exhibit F, Topographic Survey.

6. Existing & Recorded Streets

Beach Road is owned by Bloody Point Properties, LLC, and no changes will be made to this road. Bloody Point Drive, River Road and Fuskie Lane are owned by Bloody Point Club Property Owners Association. Bloody Point Drive will have minor modifications made to it to accommodate proposed improvements.

Refer to Exhibit E, Existing Lot, Roads, Rights-of-Way and Land Uses and Exhibit K, Letter from Bloody Point Club Property Owners Association, and Exhibit B, Bloody Point Conceptual Master Plan.

7. Existing & Recorded Lots

Refer to documents in Exhibit E, Existing Lot, Roads, Rights-of-Way and Land Uses.

8. Proposed Land for Public Facilities

N/A.

9. Proposed Street Layout
Refer to Exhibit B, Bloody Point Conceptual Master Plan.

10. Traffic Impact Analysis

Traffic studies are not warranted nor necessary for this application since the majority of traffic in the community is limited and via golf cart. There is limited motor vehicle traffic on Daufuskie Island and the primary mode of transportation for residents within Bloody Point is now, and will be in the future, by golf cart or shuttle system. Off-island traffic is not impacted by the proposed PUD zoning map amendment. The current ownership provides ferry service.

11. Stormwater Management, Water & Sewer Plans

a) Stormwater Management Plan

The existing storm water management system for Bloody Point includes a combination of interconnected wet detention ponds, grassed swales, and gently sloping open spaces to filter and attenuate storm water runoff from the existing development. Final discharge of storm water runoff from Bloody Point is conveyed through the interconnected wet detention ponds before reaching the adjacent critical area.

As additional development is introduced to Bloody Point, the existing system will be supplemented with additional facilities and BMPs meeting current OCRM and Beaufort County storm water management standards.

Refer to Exhibit G, Bloody Point Drainage Master Plan.

b) Potable Water Plan

Daufuskie Island Utility Company, Inc. provides potable water and fire flow to the existing development at Bloody Point. The water supply and distribution system is comprised of four deep wells with a total pumping capacity of 2,600 gallons per minute. Each well site includes a 10,000 gallon hydropneumatic storage tank. The distribution system is comprised of 10”, 8”, and 6” diameter water mains located generally within road right-of-ways.

Refer to Exhibit H, Bloody Point Water Master Plan.

c) Wastewater Collection, Treatment and Disposal

Daufuskie Island Utility Company, Inc. manages wastewater collection, treatment, and disposal for Bloody Point. The collection system is comprised of gravity sewer, pump stations and manifoldeed force mains. The system was designed with multiple pump stations to limit the depth of gravity sewer mains. A series of pump stations collects wastewater flows from their respective services areas. A manifoldeed force main network conveys wastewater from Bloody Point to the Bloody Point (f/k/a Daufuskie Island Club) Wastewater Treatment Facility (the "BP WWTF") located in the northwest corner of the Eigelberger tract. The proposed redevelopment of the golf course will extend gravity sewer form an existing pump station and proposes the addition of on\e
new pump station to manifold into the existing forcemain within Bloody Point Drive right-of-way.

At the BP WWTF, the wastewater is treated and routed through an aeration lagoon and seven day holding pond. To meet the demand of the proposed development an upgrade to the existing treatment plant is proposed to include additional aeration.

When treatment is completed, the effluent is conveyed back to Bloody Point for spray disposal on the Bloody Point Golf Course. Redeveloping the golf course will eliminate the effluent spray field while increasing the demand for effluent disposal. A combination of surface spray disposal within the Grand Lawn and underground drip disposal throughout the community is proposed to address the effluent demand.

Refer to Exhibit I, Wastewater Master Plan.

12. Overlay District Boundary

N/A

13. Comments from Affected Agencies

Comments from affected agencies, if any, will be addressed when received.

If required, the Owner will be responsible for conducting necessary archeology and environmental studies prior to beginning development.

Refer to Exhibit K, Agency Letters.

14. Proposed Ownership and Maintenance

a) Rights-of-Way

Rights-of-way now existing, or to be constructed or improved shall be owned and maintained by the Owner and/or an affiliate or property owners association now existing or hereafter established in the area containing such rights-of-way. Except as otherwise herein described, all public roads used by the Owner shall continue to be the property and responsibility of the County.

b) Drainage Systems

Drainage systems now existing, or to be constructed or improved shall be owned and maintained by the Owner and/or an affiliate or property owners association now existing or hereafter established in the area containing the drainage systems. Except as otherwise herein described, all public drainage systems used by the Owner shall continue to be the property and responsibility of the County.
c) Water & Sewer Systems

Water and sewer service is provided by Daufuskie Island Utility Company, Inc. Water and sewer infrastructure now existing or hereafter constructed or approved by the Owner and/or the Resort shall be either retained and maintained by the Owner or an affiliate or turned over to the utility company.

d) Open Space Systems

Open space shall be owned and maintained by the Owner and/or an affiliate or property owners association now existing or hereafter established in the area containing such open space.

e) Amenities

All amenities now existing, or to be constructed or improved shall be owned and maintained by the Owner and/or an affiliate. There is currently no plan to turn over any amenity to any property owners association existing or proposed to be created.

f) Covenants, Conditions and Restrictions

The Owner will work with the Bloody Point Club Property Owners Association (POA) to amend the Bloody Point Covenants, Conditions and Restrictions (CCR) to include the new owners in the POA and make available memberships to new amenities if offered such as a beach club and/or a ferry boat service.

15. Proposed Phasing and Schedule of Development

To be provided by the Owner prior to development.

16. Proposed Phasing & Time Schedule for Lands to be Dedicated for Public Facilities

N/A.

17. ARB Guidelines

The existing Bloody Point ARB Guidelines generally apply, with the following exceptions.

Site planning standards for new development within the Bloody Point PUD Amendment are proposed as follows:

a. Building sizes for single family detached and attached dwelling units shall be minimum 850 square feet per unit.

b. Freestanding hospitality units, cabins or casita square footages will be provided by the Owner prior to development, but could range between 300 SF and 850 SF.

c. Inn or hotel room sizes will be provided by the Owner prior to development.

d. Total open space shall be a minimum of 35% of total acreage (35% of 180 acres equals 63 acres minimum). Open space includes internal greenways, lakes, ponds, internal tidal marshes and wetlands.

BEACH ACT DISCLOSURE STATEMENT

Pursuant to S.C. Code Ann. §48-39-330 (1976), as amended, the Seller discloses to the Purchaser that the Property or a portion thereof if or may be subject to statutory regulation imposed by The South Carolina Coastal Zone Act of 1977, S.C. Code Ann. §48-39-10 et seq. (1976), as amended by the South Carolina Beach Management Act, S.C. Code Ann. §48-39-270 et seq. (1976) (hereinafter collectively called "the Acts"). The Acts involve, and may subject the Property to, the creation and existence of interim and final baselines, setback lines, the velocity zone and an erosion rate, all as is more fully defined in the Acts. Part or all of the Property is or may be located seaward of the setback line, the minimum setback line or interim baseline, and has an erosion rate, all as determined by the Office of Ocean and Coastal Resource Management of the South Carolina Department of Health and Environmental Control, formerly the South Carolina Coastal Council (hereinafter, "OCRM"). All or part of the Property is or may be within the velocity zone as determined by the Federal Emergency Management Agency. The Acts may also restrict the Purchasers' rights to build, repair or rebuild structures on the Property. No structure may be constructed seaward of the setback lines without a permit issued by OCRM. Pursuant to the Acts, the locations of the baselines and interim and final setback lines are subject to change. The methodology utilized in determining the exact location of the setback lines and baselines on the Property and the current applicable erosion rate may be obtained from OCRM. The methodology described above must be utilized in a case-by-case, property-by-property manner in order for an exact, surveyed determination to be made of the location of the baselines and setback lines. The Seller makes no representation to the Purchaser concerning the location of such baselines, setback lines, or the velocity zone, the effect of such regulation on the Property, or the accuracy of the foregoing disclosure.

Re: Proposed 150 Cottages and Inn at Bloody Point, Daufuskie Island, S.C.

Dear Mr. Hughes:

I am pleased to inform you that South Carolina Electric & Gas Company (SCE&G) will be able to provide electric service to the above referenced project. Service can be provided in accordance with SCE&G’s General Terms and Conditions, other documents on file with the South Carolina Public Service Commission, and the company’s standard operating policies and procedures.

In order to begin the design process for the project, the following information will need to be provided:

1.) Finalized and approved detailed site plan (hard copy and electronic AutoCAD file) showing barricade plan, all “wet” utilities, buffer zones, and any existing or additional easements. These plans must be received by SCE&G at least two months prior to the issuing of electric design and conduit plans.

2.) Approved lot numbers and premise addresses including street names for the development.

3.) Copy of Army Corps of Engineers approved wetlands delineation letter including referenced site map, or letter from Army Corps of Engineers stating no wetlands exist on site.

4.) All electric load information.

5.) Anticipated timeline for each phase of the development.

6.) A signed copy of this letter acknowledging its receipt and responsibility for its contents and the contents of its enclosures.

For more information or questions, contact me by phone at (843) 815-8808 or by email at parks.moss@scana.com.

Sincerely,

Parks Moss

Re: Bloody Point Planned Unit Development  

Dear Mr. Hughes,

In accordance with our preliminary discussions, Daufuskie Island Utility Company (DIUC) is willing to provide water and sewer service for the Bloody Point Planned Unit Development (Applicant) which is within our service area.

The Applicant must submit a written request for service. The application should include a set of engineering plans for the mains and facilities that will be necessary to connect to DIUC’s existing water and sewer utility systems, along with the estimated cost of the extension and the anticipated number and type of customers. Once the application for service is received, we will prepare a proposed extension of service agreement (Agreement) under which service will be provided. In general, the proposed Agreement will be designed to assure that DIUC’s existing customers do no bear the risk of the success of the Applicant’s development project. You should anticipate that the Agreement will contain provisions for the Applicant to be responsible for all costs to install mains and facilities necessary to provide service, and ownership of all mains and facilities will be transferred to DIUC along with necessary easements or rights of way. On the basis of our preliminary consideration, it is anticipated that at the time the Applicant/Developer sells lots to individual purchasers, those individuals will become customers of DIUC and begin to pay availability or usage rates in accordance with our approved tariff.

Once the Applicant and DIUC execute the agreement, it will be subject to approvals of the Public Service Commission, the Office of Regulatory Staff and the Department of Health and Environmental Control.

We look forward to working with you towards completion of a successful project.

Manager of DIUC

Re: Bloody Point Zoning Map Amendment

Dear Mr. Baker,

The Daufuskie Island Fire District is committed to servicing the proposed conceptual master plan for the illustrated area in Bloody Point. The impact fees associated with this development should support any additional equipment that is necessary. That being said, this review is based on the following assumptions:

1. The water flow for fire protection is sufficient as determined by the Insurance Services Organization (ISO), the International Fire Code and the Beaufort County Zoning and Development Standard Ordinances (ZDSO). Fire flow calculations shall be determined by an engineer prior to final approval of any development plans.
2. Where water flow is insufficient for fire protection, residential fire sprinkler systems shall be installed in accordance with NFPA standards or an alternative method of fire protection shall be established.
3. All Fire Apparatus Access Roads shall be a minimum of 20’ wide having a vertical clearance of 13’-6”.
4. Dead end cul-de-sacs shall have a turning radius of not less than 40’.
5. Bridges shall be built in accordance with DOT standards and be capable of supporting the loads of the fire apparatus.
6. Hydrants shall be spaced and located in accordance with the ZDSO, ISO and approval of the Daufuskie Island Fire District’s Fire Marshall.

Please don’t hesitate to call if you have any questions with regard to fire protection.

Best wishes,

Dear Mr. Baker:

SUBJ: Letter of Intent to Provide Service for: Bloody Point, Daufuskie Island

Hargray Engineering Services has reviewed the master plan for the above referenced project. Hargray Communications has the ability and intent to serve the above referenced project. Forward to our office a digital copy of the plan that has been approved by the county/town for use with Microstation or AutoCAD. Our office will then include owner/developer conduit requirements on the approved plan and return to your office.

By accepting this letter of intent to serve, you also accept sole responsibility to forward the requirements and Project Application Form to the owner/developer. The Project Application Form identifies the minimum requirements to be met as follows:

- Commercial buildings – apartments – villas: Minimum 4 inch diameter conduit Schedule 40 PVC with pull string buried at 24 to 30 inch depth, from the equipment room or power meter location to a point designated by Hargray at the road right-of-way or property line. **Conduits are required from each building site and multiple conduits may apply.**
- Commercial buildings with multiple “units” may require conduit(s) minimum ¾” from main equipment entry point to termination point inside unit. Plenum type ceilings require conduits or flame retardant Teflon wiring to comply with code.
- Hotel or large commercial project requirements would be two (2) 4 inch diameter Schedule 40 PVC underground conduits.
- Equipment rooms to have ¾ inch 4’x8’ sheet of plywood mounted on wall to receive telephone equipment.
- A power ground accessible at equipment room or an insulated #6 from the service panel or power MGN to the backboard.
- Residential wiring requires CAT5E wiring (4 or 6 Pair) twisted wire for Telephone and Data. Industry Standard.
- All interior wiring should be pulled to the area immediately adjacent to the plywood backboard or power meter location. A minimum of 5' of slack is required for terminations.

**Aid in or Aid to Construction may apply to certain projects.**

**Easements are required prior to installing facilities to your site.**

Should there be any changes or additions to the original master plan, this letter will only cover those areas which are shown on the original master plan. All changes or additions would require another Letter of Intent to supply service. All costs incurred by the Telephone Company resulting from any requested change or failure to comply with minimum requirements shall be borne by the Developer. **Commercial projects require pre-construction meeting with Telco Company to review requirements.** I am available to discuss these requirements in more detail at your convenience.

Sincerely,

Frankly Denmark
