Hilton Head Island Airport Recognized for Training Excellence

The American Association of Airport Executives (AAAE), in conjunction with the Airport News and Training Network (ANTN), has recognized 92 airports, including the Hilton Head Island Airport, with an ANTN Digicast Excellence in Airport Training award for 2014.

An ANTN Digicast Excellence in Airport Training award signifies that airport employees and other workers at airport facilities have completed a specified amount of federally mandated airport-specific and continuing education training using ANTN Digicast's web-based training system.

"This marks four consecutive years our firefighters have received this prestigious recognition. I am extremely proud of their commitment and professionalism," stated Beaufort County Airports Operations Chief Larry Yeager.

The award is issued in categories based on the hub size of an airport. Each winning airport will be presented with a plaque marking the achievement.

Beaufort County Airports Director Jon Rembold stated, "This proves again that we have extremely dedicated professionals keeping us safe at the airport. They take this training very seriously and this recognition is very appropriate."

Airports that subscribe to ANTN Digicast have unlimited access to hundreds of training programs. Topics covered include operations, aircraft rescue and firefighting, security, customer service, and FAA required recurrent training.
