Treasurer Announces Interactive Delinquent Property Map

The Beaufort County Treasurer's Office is pleased to announce the availability of our interactive delinquent property map. In partnership with the Beaufort County Mapping and Applications Department, the map identifies delinquent properties that will be sold at auction if not paid before 5:00 p.m. on Friday, September 30, 2016. Included on the map are details such as the taxes due, owner name, acreage and subdivision in which the property is located. Redemption information is also shown, including the amount of the winning bid and the current redemption amount.

"Through the use of technology, government entities can now provide more resources to citizens than ever before. We are leveraging that technology to not only promote transparency, but to create resources for our citizens that are user-friendly," said Maria Walls, CPA, Beaufort County Treasurer.

The delinquent property map as well as other data and information related to the delinquent tax sale is available at www.BeaufortCountyTreasurer.com.
