UPDATE: Convenience Centers to Accept Non-Storm Generated Yard Waste

On Monday, December 12, all Beaufort County [Convenience Centers](#) will resume accepting limited amounts of non-storm generated yard waste (Class 1).

Waste for Convenience Centers

Class 1 waste accepted at Convenience Centers includes **small limbs, leaves and landscape trimmings**. Capacity for this material is limited. No trailers or large loads will be accepted. Residents who wish to drop off waste in bags should use paper bags. Waste in plastic bags will need to be emptied at time of drop off.

Debris Removal

Debris removal contractors are making the second pass through the County. Residents are asked to sort Class 1 and Class 2 debris into separate piles on the right-of-way at their residence for collection. The separation categories for debris placed at rights-of-way are:

- Class 1 debris - includes tree limbs and tree logs cut into sections
- Class 2 debris - includes building materials, drywall, lumber, carpet, furniture, mattresses and plumbing items

The County advises residents not to block fire hydrants, stormwater ditches or utility boxes when placing items at the right-of-way.

Residents are encouraged to visit the Beaufort County Public Works Department [Solid Waste and Recycling Office](#) web page for more information about the County's Convenience Centers.
