Application Affidavit

The applicant acknowledges that application and issuance of the local Beaufort County Stormwater Permit does not preclude the need to obtain a NPDES permit from SC-DHEC per the South Carolina Erosion and Sediment Reduction act of 1983 as promulgated via 72-300, Standards for Stormwater Management and Sediment Reduction. Any change to the SWPPP associated with this permit as a result of permitting by DHEC renders this permit void until revised by the applicant to match the DHEC approved plan. The applicant further acknowledges the County may refuse to conduct inspections and may issue Notices of Violation, Stop Work Orders, and/or Civil Penalties for failure to comply with DHEC requirements.

4. FEES ARE APPLICABLE TO THE INITIAL APPLICATION FOR DESIGN AND CONSTRUCTION REVIEW. APPLICATIONS TO ESTABLISH POST CONSTRUCTION BMP OPERATIONS AND ANNUAL INSPECTIONS ARE EXEMPT FROM FEES.

Beaufort County, South Carolina

TIER I SWPPP & LAND DISTURBANCE FORM

This form can serve as the SWPPP for all new construction of single family development and additions/alterations of existing single family structures disturbing more than 5,000 sq. ft. of ground. Lots that are part of a larger common plan of development (LCP) that have permit coverage under a SC-DHEC NPDES NOI may submit a TIER I SWPPP, however the SWPPP preparer is responsible to assure that the TIER I SWPPP is consistent with the SWPPP on file as part of the DHEC NPDES permit coverage. Any change to the SWPPP associated with this permit as a result of permitting by DHEC renders this permit void until revised by the applicant to match the DHEC approved plan.

If these requirements are not met a Tier II SWPPP will be required.

For Office use only:

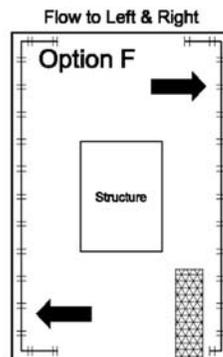

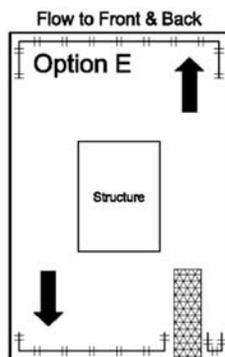

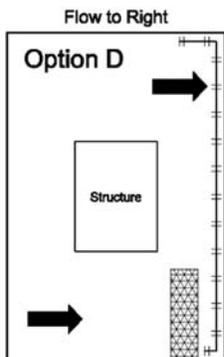

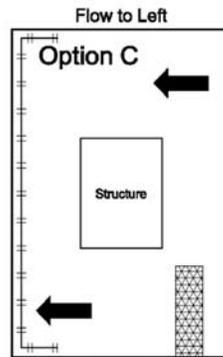

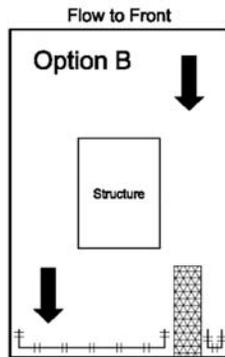

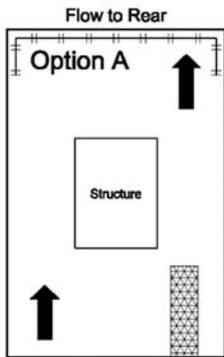

PERMIT # _____

Name and Address of Permittee:

CHECK HERE IF SITE IS COVERED BY A COMMON PLAN SWPPP. ATTACHED.

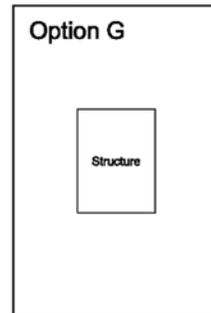

EPSC OPTIONS

INSTRUCTIONS: Identify one or any combination of letters for the EPSC schematic that best describes the measures that will be used on this property during construction to control surface runoff, reduce erosion, and retain sediment.

Legend

- — — — — Silt fence or approved equal (Must be located outside of project ROW)
 - XXXXXXXX Sidewalks (Locate on selected option(s) - silt fence should be structure side of SW)
 - Stabilized Construction Entrance
 - Direction of flow (point downhill)
- For Option G, show flow lines and proposed EPSC measures.

Appropriate curb/ditch inlet protection is required downstream of the construction site for any structure within 200 ft of the site. See the BMP Manual for inlet protection details.
